AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions, and listings, of the claims in this application.

Listing of Claims:

- 1. (Currently Amended) A system for contacting help comprising: an emergency device carried on the person of a user, said emergency device having a wireless sending unit activated by an activation unit, wherein the emergency device is formed so as to prevent accidental activation; a mobile telephone having a wireless receiving unit adapted to receive signals from said wireless sending unit, said mobile telephone being adapted for communicating with a telephone network to call an emergency number; in which said emergency device sends a signal to said mobile telephone in response to the activation of said wireless sending unit; and said mobile telephone calls said emergency number in response to said signal.
- 2. (Original) A system according to claim 1, in which: said signal includes data selected from the group comprising medical information, location and contact information.
- 3. (Original) A system according to claim 1, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 4. (Original) A system according to claim 2, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 5. (Original) A system according to claim 1, in which: said mobile telephone includes means for estimating the location of the user.
- 6. (Original) A system according to claim 5, in which: the means for estimating the location of the user comprises a GPS receiver.
- 7. (Currently Amended) A system according to claim <u>3</u> 1, in which: the mobile telephone sends a signal to a telephone network activating a response from the telephone network.
- 8. (Original) A system according to claim 7, in which: the response from the telephone network comprises at least receiving said stored data and transmitting the stored data to the emergency number.
- 9. (Original) A system according to claim 7, in which: the response from the telephone network

includes estimating the location of the user by analyzing signals from the mobile telephone.

- 10. (Original) A system according to claim 8, in which: the response from the telephone network includes estimating the location of the user by analyzing signals from the mobile telephone.
- 11. (Currently Amended) An apparatus for contacting help comprising: an emergency device carried on the person of a user, said emergency device having a wireless sending unit activated by an activation unit; and a mobile telephone having a wireless receiving unit adapted to receive signals from said wireless sending unit, said mobile telephone being adapted for communicating with a telephone network to call an emergency number; in which said emergency device sends a signal to said mobile telephone in response to the activation of said wireless sending unit; and said mobile telephone calls said emergency number in response to said signal, if an operator at the emergency number answers by voice and then does not receive a voice response in reply, the signal from the medical devices is interpreted as a medical emergency.
- 12. (Currently Amended) An apparatus A system according to claim 11, in which: said signal includes data selected from the group comprising medical information, location and contact information.
- 13. (Currently Amended) <u>An apparatus A-system</u> according to claim 11, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 14. (Currently Amended) An apparatus A system according to claim 12, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 15. (Currently Amended) An apparatus A system according to claim 11, in which: said mobile telephone includes means for estimating the location of the user.
- 16. (Currently Amended) An apparatus A system according to claim 15, in which: the means for estimating the location of the user comprises a GPS receiver.
- 17. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset, the medium embodying instructions executable by the computing device for performing method steps comprising: receiving signals from a wireless sending unit carried on the person of a user, said mobile telephone being adapted for communicating with a telephone network to call an emergency

number; in which said emergency device sends a signal to said mobile telephone in response to the activation of said wireless sending unit; and said mobile telephone calls said emergency number in response to said signal, wherein the wireless sending unit is capable of turning on the mobile telephone.

- 18. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset A system according to claim 17, in which: said signal includes data selected from the group comprising medical information, location and contact information.
- 19. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset A system according to claim 17, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 20. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset A system according to claim 18, in which: said emergency device includes stored data on the user's prior medical conditions and any allergies to medication.
- 21. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset A system according to claim 17, in which: said mobile telephone includes means for estimating the location of the user.
- 22. (Currently Amended) An article of manufacture comprising a program storage medium readable by a computing device in a mobile telephone handset A system according to claim 21, in which: the means for estimating the location of the user comprises a GPS receiver.
- 23. (New) A system according to claim 1, wherein the emergency device comprises a button and a cylinder where the button is surrounded by the cylinder which extends higher than the button to reduce the change of accidentally pressing the button.
- 24. (New) A system according to claim 1, wherein the emergency device is in the form of a bracelet.
- 25. (New) An apparatus according to claim 11, wherein if the emergency device does not receive a response from the mobile phone, the emergency device then automatically signals other phones within a distinctive signal pattern.
